High School Diploma	Liceo Classico "Paolo Diacono", Cividale del Friuli (Italy) 1971
M.D. Degree	University of Padova (Italy), summa cum laude 1978

APPOINTMENTS

1979 – 1987:	Assistant Professor , University of Padova Medical School
1988 – 1999:	Associate Professor , University of Padova Medical School
2000 – present:	Full Professor , University of Padova Medical School
2001 – 2004:	Deputy Dean of the Medical Faculty, University of Padova
2003 – 2009:	Chairman , Department of Biomedical Sciences, University of Padova
2012 – 2018:	Director , Postgraduate School of Clinical Pathology, University of Padova
2012 – 2020:	Coordinator , Ph.D. Program in Biomedical Sciences, University of Padova

HONORS

1984:	EMBO Fellow , University of Helsinki, Finland
1985 – 87:	Fogarty Fellow , Whitehead Institute for Biomedical Research, Cambridge Massachusetts, USA
2006 – 2010:	Council Member , Bioenergetics Subgroup, Biophysical Society USA
2006 – 2014:	Socio Corrispondente , Istituto Veneto di Scienze, Lettere ed Arti, Venice
2008:	Visiting Professor , Oregon Clinical and Translational Research Institute, Portland, Oregon, USA
2009 – 2011:	Council Member , Associazione di Biologia Cellulare e del Differenziamento
2010 – 2013:	President , Italian Group of Biomembranes and Bioenergetics
From 2010:	Member , Academia Europaea
2012:	Prize for Physiology and Pathology , Ministro Beni e Attività Culturali, Accademia Nazionale dei Lincei, Rome
2014 – 2016:	Council Member , Bioenergetics Subgroup, Biophysical Society USA
From 2015:	Socio Effettivo , Istituto Veneto di Scienze, Lettere ed Arti, Venice
From 2016:	Scientific Advisory Board Member , Institute Cochin, Paris
From 2016:	Scientific Committee Member of Fondazione Fibrosi Cistica, Verona
2016 – 2019:	Member , Consiglio direttivo della Scuola Galileiana di Studi Superiori, Padova
2016 – present:	President , Italian Group of Biomembranes and Bioenergetics
From 2019:	Socio Corrispondente , Istituto Lombardo–Accademia di Scienze e Lettere, Milano
From 2022:	President, Scientific Committee of Fondazione Fibrosi Cistica, Verona

SCIENTIFIC INTERESTS AND CAREER HIGHLIGHTS

Paolo Bernardi began his studies on mitochondrial physiology and ion transport under the guidance of Giovanni Felice Azzone, one of the founding Fathers of Bioenergetics. His education in Cellular and Molecular Biology was completed with a long-term stay at the Whitehead Institute for Biomedical Research - Massachusetts Institute of Technology, where he worked under the supervision of Harvey F. Lodish. He pioneered the field of mitochondrial channels and their role in cellular pathophysiology. In particular, he focused on the permeability transition pore (PTP), a high conductance channel that is increasingly recognized as a key player in cell death. During the early 1990s he defined key points of regulation of the PTP in isolated mitochondria (membrane potential, matrix pH, Mg^{2+} -binding sites, specific redox-sensitive sites). He then developed tools to reliably monitor mitochondrial function *in situ*, and addressed mechanistic questions on the PTP as a target in degenerative diseases and cancer. His studies have been extended to *in vivo* models, and led to the demonstration that early mitochondrial adaptation plays a key role in hepatocarcinogenesis [Klöhn et al. (2003) *Proc Natl Acad Sci USA* 100, 10014-10019] and in onset of the Warburg effect [Sciacovelli et al. (2013) *Cell Metab* 17, 988-999]; and that mitochondrial dysfunction mediated by the PTP unexpectedly causes muscular dystrophy in collagen VI deficiency [Irwin et al. (2003) *Nat Genet* 35, 367-371; Angelin et al. (2007) *Proc Natl Acad Sci USA* 104, 991-996; Merlini et al. (2008) *Proc Natl Acad Sci USA* 105, 5225-5229]. These studies paved the way to a potential therapy of Ullrich Congenital Muscular Dystrophy and Bethlem Myopathy with NIM811, a non immunosuppressive analog of cyclosporin A [Zulian et al. (2014) *Hum Mol Genet* 23, 5353-5363]. The recent identification of the PTP, which appears to originate from dimers of the F_0F_1 ATP synthase [Giorgio et al. (2013) *EMBO Rep.* 14, 5887-5892; Urbani et al. (2019) *Purified F-ATP synthase forms a Ca^{2+} -dependent high-conductance channel matching the mitochondrial permeability transition pore, Nat. Commun.* (2019) 10, 4341] and the dissection of its key regulatory sites [Giorgio et al. (2017) Ca^{2+} binding to F-ATP synthase β subunit triggers the mitochondrial permeability transition, *EMBO Rep.* 18, 1065-1076; Antoniel et al. (2018) The unique histidine in OSCP subunit of F-ATP synthase mediates inhibition of the permeability transition pore at acidic pH, *EMBO Rep.* 19, 257-268; Carraro et al. (2020) The Unique Cysteine of F-ATP Synthase OSCP Subunit Participates in Modulation of the Permeability Transition Pore, *Cell Rep.* 32, 108095]. These advances offer great promise for further molecular definition of the pore and of its function in health and disease. Development of novel chemical inhibitors of the PTP with potential use in degenerative diseases developed with NIH funding is currently one of the most successful research programs of the Bernardi lab.

Paolo Bernardi was a major actor in the Mitochondrial Renaissance of the 1990s. As early as 1992 he was one of the few to realize the importance of mitochondria in cell death well before the role of cytochrome *c* release was shown to be a key event in apoptosis. He pioneered the field rapidly reaching international recognition, as testified by 357 invited lectures (220 conference talks and 137 seminars at prestigious Institutions worldwide). He has organized or coorganized key meetings on mitochondrial pathophysiology that significantly contributed to the continuing success of the field (see below). His achievements were possible through the work and training of junior personnel (from 1991 Prof. Bernardi has supervised the work of over 60 Graduate Students and postdoctoral Fellows).

MEETINGS AS ORGANIZER

1. Conference *New Perspectives in Mitochondrial Research*, Padova, Italy 1993
2. Colloquium *Mitochondria in Cell Death*, 8th European Bioenergetics Conference, Valencia, Spain 1994
3. Colloquium *The Mitochondrial Permeability Transition in Accidental and Programmed Cell Death*, 9th European Bioenergetics Conference, Louvain-la-Neuve, Belgium 1996
4. First Conference *Frontiers in Mitochondrial Research*, Albany, NY 1996
5. Conference *New Perspectives in Mitochondrial Research*, Padova, Italy 1997
6. Second Conference *Frontiers in Mitochondrial Research*, Albany, NY 1998
7. Third Conference *Frontiers in Mitochondrial Research*, Albany, NY 2000
8. Symposium *New Frontiers in Mitochondrial Research – from Bioenergetics to Dynamics*, Bertinoro, Italy 2007
9. 52nd Annual Meeting of the Biophysical Society USA, Bioenergetics Subgroup Meeting *Mitochondria Bioenergetics in Disease and Therapeutics*, Long Beach, CA 2008
10. 54th Annual Meeting of the Biophysical Society USA, Bioenergetics Subgroup Meeting *Mitochondria in Disease*, San Francisco, CA 2010
11. 58th Annual Meeting of the Biophysical Society USA, Bioenergetics Subgroup Meeting *Ion Channels in the Inner Mitochondrial Membrane*, San Francisco, CA 2014
12. Cold Spring Harbor Asia Conference *Mitochondria*, Suzhou, China 2015
13. 19th European Bioenergetics Conference, Riva del Garda, Italy 2016

14. Cold Spring Harbor Asia Conference *Mitochondria*, Suzhou, China 2017
15. Cold Spring Harbor Asia Conference *Mitochondria and Metabolism in Health and Disease*, Suzhou, China 2019

BIBLIOMETRIC INDICATIONS

As of June, 2022 Prof. Bernardi has published 273 articles that have received 39,396 citations, H index 100 (Google Scholar). In the *Updated science-wide author databases of standardized citation indicators* [Ioannidis et al., (2020) *PLoS Biology* 18: e3000918] he ranks in the top 1,9 percentile worldwide (position 3,055 of 159,684). His most quoted paper [Bernardi P (1999) Mitochondrial transport of cations: Channels, exchangers and permeability transition. *Physiol Rev* 79, 1127-1155] has 1,840 citations. His "top ten" list gathers over 9,700 quotes.

INVITED LECTURES AT MEETINGS

1. 13th International Congress of Biochemistry, International Union of Biochemistry (Amsterdam, Holland 1985)
2. NATO Advanced Research Workshop *Mechanics of Swelling: From Clays to Living Cells and Tissues* (Korfu, Greece 1991)
3. 37th Annual Meeting of the Biophysical Society USA, platform presentation (Washington, DC 1993)
4. Euromech Colloquium *Mechanics of Swelling* (Rhodes, Greece 1993)
5. Workshop *New Perspectives in Mitochondrial Research* (Padova, Italy 1993)
6. 2nd IUBMB Conference *Biochemistry of Cell Membranes* (Bari, Italy 1993)
