1. Personal information

<p>Given name: Francesco Saverio Family name: Violante</p> <p>Place and date of birth: Bari, Italy, 27 January 1955</p> <p>Business address: Unità Operativa Medicina del Lavoro Policlinico Sant'Orsola Malpighi via Palagi 9, 40138 Bologna, Italy phone: +39-051-214-2608 mobile phone: +39-328-723-0652 e-mail: francesco.violante@unibo.it</p>	
<p>Additional information: I live in Bologna with my wife Luciana, our kids Anna and Tommaso, and Vaniglia (our Labrador), and I work in Bologna, in Italy and abroad.</p>	

2. Work experience

2.1 Present position

Full Professor of Occupational Medicine, Alma Mater Studiorum University of Bologna, Italy, and Director, Unit of Occupational Medicine, Sant'Orsola Malpighi University Hospital, Bologna, Italy

2.2 Previous positions

1.3.2002 - 30.9.2006: Associate Professor of Occupational Medicine, University of Bologna and Director, Unit of Occupational Medicine, Sant'Orsola Malpighi University Hospital (since 1.5.2000 to 31.12.2001 and again since 1.7.2004)

15.1.1983 - 28.2.2002: Staff physician, Unit of Occupational Medicine, Local Health Authority, Bologna (until 29.12.1987) and then at Sant'Orsola Malpighi University Hospital, Bologna.

3. Education and training

3.1 Academic qualifications

1973-1979: Degree in Medicine (MD), University of Bologna

1979-1983: Specialization in Occupational Medicine, University of Padua

1983-1986: Specialization in Forensic Medicine, University of Macerata

1986-1989: Specialization in Clinical Neurophysiology, University of Pavia

3.2 Other qualifications

1985: Inclusion in the national list of physicians qualified for health surveillance of workers exposed to ionizing radiation (number 762 of the national list).

4. Personal skills

4.1 Mother tongue

Italian

4.2 Foreign language

English: C1 level - Proficient user (understanding, speaking and learning)

4.3 Communications skills

Excellent communication skills gained through my experience as a physician, a professor and a researcher.

4.4 Organizational skills

Skills	Level
Planning, implementation and direction of multidisciplinary, technologically complex, health research and service center	Advanced
Implementation of international networks of research collaboration	Advanced
Planning and realization of large cohort studies	Advanced
Mentoring students and young researchers	Advanced

4.5 Clinical skills

Skills	Level
Clinical preventive services	Advanced
Diagnosis and treatment of environmental and occupational diseases	Advanced
Electromyography and evoked potentials	Advanced
Spirometry	Advanced
Audiometry	Advanced

4.6 Digital skills

Skills	Level
Information processing	Proficient user
Communication	Proficient user
Content creation	Independent user
Safety	Proficient user
Problem solving	Proficient user
Other computer skills	Statistical analysis software (Stata, R), Signal processing, Programming (intermediate)

5. Appointment in experts' committees

1990 - 1995: Appointed by the Regional Government as a member of the Technical Group for the evaluation of programs of Local Health Authorities (Resolution 5222, 30.10.1990)

1992 - 2002: appointed by the Regional Government as a member of the Regional Oncologic Commission (Resolution 994, 24.3.1992 and 1323, 26.7.1999)

1995 - 2004: Appointed by the Regional Government as a member of the Task-Force for the application of the Law 626/1994 (occupational safety and health) in Emilia Romagna

2003 - 2006: Appointed to the experts' committee for the "European risk observatory" of the European Agency for Safety and Health at Work, Bilbao

2007 - 2012: Appointed by the Regional Government as a member of the Scientific Committee for the MONITER project in Emilia Romagna (impact of waste incineration on environment and health, https://www.arpae.it/pubblicazioni/moniter/generale_624.asp)

2016 -2018: Appointed to the commission for the National Scientific Qualification (Abilitazione Scientifica Nazionale) for full and associate professors in occupational health

2018 - 2022: Appointed by the Ministry of Health in the Expert committee for health and safety policy and for coordination of labor inspections

6. Membership in scientific societies

International Commission on Occupational Health, Member of the Board of Directors (2018 - 2021)

Italian Society of Occupational Medicine, Past-President (2019 - 2022)

College of the Italian Professors of Occupational Medicine, President (2018 - 2022)

The Bertrand Russell Society, member

The British Wittgenstein Society, member

7. Research activity

During the almost 40 years of my research activity I have explored different areas of occupational and environmental health with strong focus on linking research activity to practice, adhering to the principle of evidence-based medicine. This still characterizes my scientific activity (and the one of my coworkers).

The initial period (1980-1990) of my research activity is characterized by a specific interest toward the application of the electrophysiological techniques (learned during a fellowship at the Department of Physiology of the University of Liverpool in 1981) to the study of work-related diseases, specifically to the exposure to pesticides and solvents. Emblematic of that period are some papers on neuropathies associated with the exposure to organo-phosphorous pesticides and solvents, mostly published on Italian scientific journals. During the same years, I developed a specific interest toward clinical epidemiology and environmental and occupational toxicology (primarily applied to the study of environmental and occupational exposure to organo-chlorine pesticides).

Afterwards (1990-2000), the interest toward the application of electrophysiologic techniques to occupational medicine brought me to apply them to the study of the upper arm disorders, and specifically to the carpal tunnel syndrome. In this field I started an intense series of international relations (still ongoing), in particular with the Center for Ergonomics of University of Michigan and other centers in the United States and Europe. At the same time, I strived to find the human and financial resources needed to equip an electrophysiology and biomechanics lab to investigate the occupational upper limb musculoskeletal diseases (mostly for the study of nerve, muscles and tendons), a toxicology lab equipped with high quality instruments for chemical analysis and an epidemiology lab. In those years I started to publish my first papers on occupational musculoskeletal diseases and I organized the first national congress held on this topic in Italy (Italian Society for Occupational Health and Industrial Hygiene Bologna, 1995).

Subsequently (2000-2010), having collected the necessary human, instrumental and financial resources, I started an intense research activity on musculoskeletal disorders, epidemiology, occupational and environmental toxicology and preventive medicine, as recorded by a number of papers published in journals with Impact Factor, book and chapters of books published by international publishers. With regard to the environment, I have been a member of the Scientific Committee of the MONITER project of Emilia-Romagna Region (impact of waste incineration on environment and health) and I have been in charge of the Health Impact Assessment of major Italian road infrastructures projects, such as the Tirreno-Brennero motorway, the Outer Milan Parkway (Tangenziale Esterna Milanese) and the Cispadana motorway.

My recent activity (2010 to the present) has focused more on epidemiological methods (both cancer epidemiology and other diseases), musculoskeletal epidemiology, global health issues and health economics. One of the most recent research project I am involved in, as a national expert for Italy, is the

Global Burden of Disease Study, run by the Institute for Health Metrics and Evaluation (Prof. CJ Murray) and funded by the Bill and Melinda Gates Foundation. I am also the principal investigator of the world's largest longitudinal study published to date on work-related carpal tunnel syndrome (4,000 workers, 10 years of follow-up). Currently, I am also working with several companies to improve ergonomics and efficiency of manufacturing process. Some innovative products have been devised during this research, currently awaiting to be assigned international patents, and others are being actively developed.

I have always valued international collaboration in research and training: I have been responsible for setting up (and I am presently overseeing on the Bologna side) a Memorandum of Understanding for common research projects, exchange of teachers and students, between the School of Medicine of the University of Bologna and the Harvard School of Public Health and the Mount Sinai School of Medicine.

7.1 Patents

- 3.11.2016 number 102016000110570, Ergonomic handle for hand-held tools
- 21.6.2017 number 102017000069353, Sensorized glove for monitoring hand force during manual work
